Table of contents

Welcome!

A template to write books ready for self-publishing

Go to https://github.com/b-rodrigues/kdp_quarto for the source code.

Go to https://b-rodrigues.github.io/kdp_quarto/ to visit the published website.

```
a very long line of R code that wraps in html,
 ↪  epub and PDF! In a pdf especially this is
 ↪  needed
```

```
data(mtcars)
lm(mpg ~ ., data = mtcars)
```

```
Call:
lm(formula = mpg ~ ., data = mtcars)

Coefficients:
(Intercept)          cyl         disp           hp
drat           wt
```

```
12.30337      -0.11144       0.01334      -0.02148
0.78711      -3.71530
    qsec            vs            am          gear
    carb
 0.82104       0.31776       2.52023       0.65541
 -0.19942
```

This is how you can show verbatim code chunks in the output. This is using a `{verbatim}` chunk (check the source `index.qmd`):

````
```{r}
a very long line of R code that wraps in html,
 ↪  epub and PDF! In a pdf especially this is
 ↪  needed
```
````

If you want to show the triple backticks inline, you can also do so, like this: `` ```{r} `` to start an R chunk and `` ``` `` to end it. Check the source.

Figures

Use `knitr::include_graphics()` to include images. Check the source for how to add labels and captions:

```r
knitr::include_graphics("images/gosling.jpg")
```

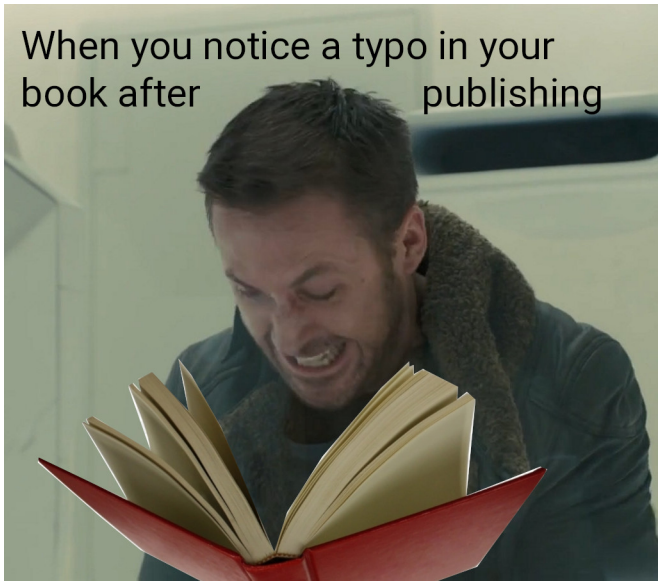

Figure 1: Ryan Gosling looking angry.

See Figure 1 for a meme.

Conditional content

The block below does not appear in the PDF, only on the website and Epub:

But this text here, will only appear in the PDF!

1 Preface

Adding some content here

2 Introduction

Some more content here

3 Chapter 1

4 Conclusion

5 References
